

### ULTRA CSX

Carbon Ceramic Window Film

### Why choose Ceramic Window Film over traditional Dye Films?

Apollo ULTRA CSX series uses a proprietary process utilizing carbon as the pigment instead of traditional dyes to darken film. This ensures color stability.

CSX also contains Nano Ceramic materials instead of traditional metal layers. This allows the film to out perform High Performance Metalized Films by blocking IR (infrared rays).

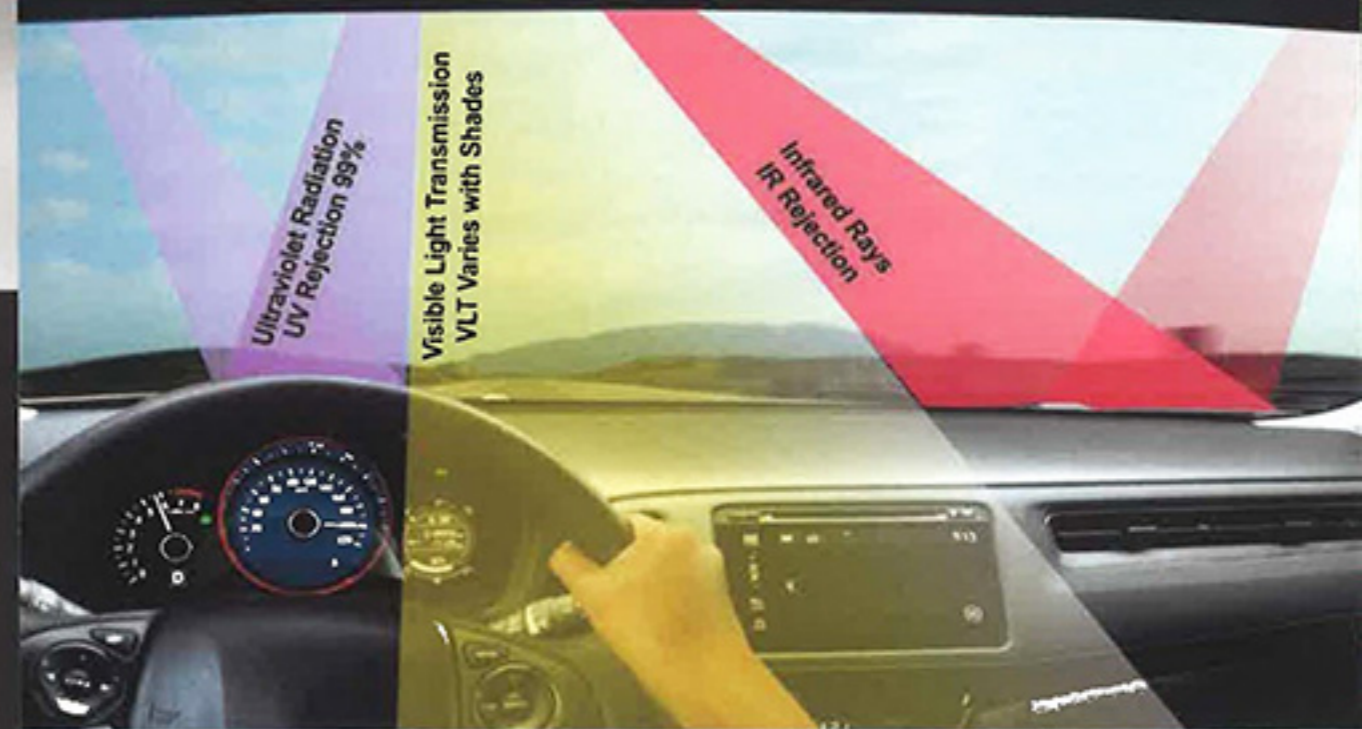

Rejects 99% of Harmful UV A&B Rays  
that can lead to skin Cancer.

*Protect Yourself  
From Skin Cancer*

- IR Rejection (*Infrared Rejection*)
- Blocks Heat
- Reduces Glare
- Rejects 99% UV A&B Rays
- Protects Interior & Passengers from Harmful UV Rays
- Allows:  
    **Satellite GPS & Cellular Signals**
- Increases Privacy
